Skills

Cloud & AWS
AWS, EC2, S3, EBS, VPC, IAM, Route 53, Elastic Load Balancing, Auto Scaling, CloudWatch, CloudTrail, RDS, AWS CLI

Infrastructure as Code & Containers
Terraform, Docker

CI/CD & Version Control
GitLab CI/CD, GitLab, Jenkins, Git, GitHub

Scripting & Systems
Linux, Bash, Shell Scripting, Python, PuTTY

AI Automation
RAG, LLMs, OpenAI API, LangChain, Prompt Engineering, NLP, Text Embeddings, Semantic Search, Vector Search, Vector Similarity, FAISS, ChromaDB, Sentence Transformers, Ollama, Streamlit

Collaboration Tools
Jira, Confluence

Certifications

- **AWS Certified Cloud Practitioner**
- **Infosys Certified Cloud AWS Cloud Practitioner**
- **Infosys Certified AWS Public Cloud Associate**
- **Infosys Certified AWS Solutions Architect Associate**

Education

- **Bachelor's Degree in Electronics Engineering**

Summary

Cloud DevOps Engineer specializing in secure, scalable AWS infrastructure, Infrastructure as Code with Terraform, and CI/CD automation using GitLab. Also builds Python-based Generative AI solutions, including Retrieval-Augmented Generation (RAG) applications using embeddings, vector databases, and LLM inference. Seeking opportunities in Cloud, DevOps, and AI Automation.

Experience

Infosys - Senior Associate Consultant Aug 2022 – Present

- Provision and manage AWS infrastructure including EC2, VPC, IAM, S3, and RDS using Terraform for version-controlled, repeatable deployments across environments.
- Design and maintain GitLab CI/CD pipelines for source control, automated validation, builds, and deployments, reducing reliance on manual release steps.
- Containerize applications with Docker to standardize packaging and configuration for consistent deployments.
- Automate operational and troubleshooting tasks with Bash and Python to reduce manual effort.
- Apply Git workflows including branching, pull requests, and code reviews to support collaborative delivery.
- Build Python-based local RAG applications using Sentence Transformers for embeddings, ChromaDB for vector storage, and Ollama for LLM inference to enable natural-language question answering over documents.

Wipro - Technical Support Specialist Mar 2019 – Aug 2022

- Delivered L1/L2 support across Windows, Linux, networking, and enterprise applications while resolving incidents within SLA.
- Performed root cause analysis with cross-functional teams to resolve recurring and complex issues.
- Managed incidents and service requests in ticketing tools with accurate documentation.
- Provided remote technical support with a focus on customer satisfaction.

Magna Infotech - Technical Support Associate Oct 2016 – Feb 2017

- Resolved hardware, software, and application issues through phone and email while meeting SLA targets.
- Logged and tracked incidents using HP Service Manager (HPSM).

Projects

AI PROJECTS

- Radiation Oncology AI Chatbot
- AI-Powered Women's Health Companion
- ResearchMate-AI

CLOUD & DEVOPS PROJECTS

- Full-Stack Application Deployment on AWS
- AWS Infrastructure Provisioning with Terraform
- Docker-Based Application Containerization
- AWS Static Website Hosting
- AWS IAM Security Lab

VERSION CONTROL

- Git Workflow Simulation
